

## Defining Classes Lab – Part 2

This is an individual lab and a follow up to the **Defining Classes Lab – Part 1**. You are to build upon your lab from last week.

Your tasks:

1. Update your class diagram(s) with any changes you might want to make to your previous lab. Your class diagram(s) must support the system's use case specifications.
2. Create an Object Level sequence diagram for one of the “add” system's use case specifications.
3. Create an Object Level sequence diagram for one of the “change” system's use case specifications.
4. Create an Object Level sequence diagram for one of the “delete” system's use case specifications.
